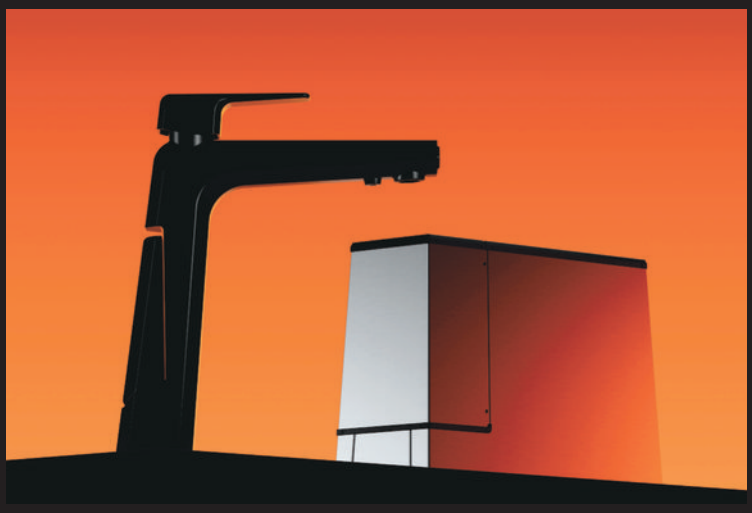
Respo

Smart Home Water System

ONE product - more than just FIVE different waters

The RESPO smart ionized water system provides much more than just healthier, cleaner, and tastier drinking water.
It allows you to take better care of yourself, your environment, and your loved ones every day in natural ways.



01 **Alkaline water -** high pH, for daily consumption.

02 **Acidic water - f**or household cleaning.

03 **Filtered water** - without odors or unusual flavors.

04 **Mineralized water -** enriched with natural minerals.

05 **Tap water -** supplied from the tap.

Solving Problems with Better Water and a Greener Future

- Water quality
- Convenience
- Taste
- Environmental impact

Smart and environmentally friendly ionized water system

RESPO naturally blends into your world. Whether life is flowing like a rushing river, or at a calm, steady pace. RESPO combines the latest technologies and natural water powers to help create a harmonious life every moment.

Functionality and added values

friendly solutions

Sustainability. We create the future today.

SUSTAINABILITY AND LONGEVITY

High-quality components and materials used in RESPO water systems extend their service life, reducing the frequency of replacements and the associated use of resources.

REDUCING PLASTIC WASTE

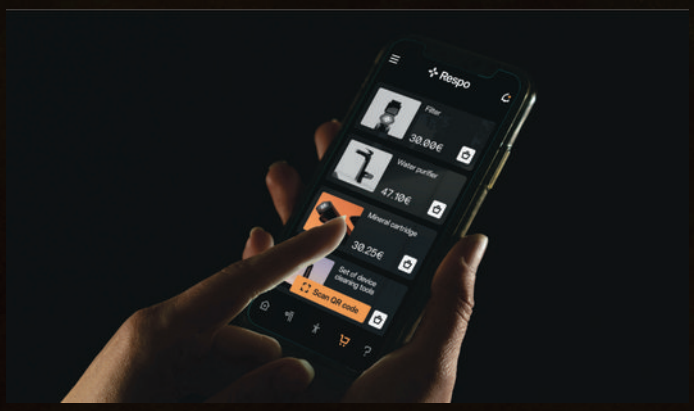
Reduces the need to use bottled water, which leads to a reduction in plastic waste and cost savings.

Respo mobile app - personalized experience for every user

- Convenient and efficient water system control.
- Personalized recommendations based on usage patterns.
- Maintenance reminders.

Advice and purchase at AQUACENTRUM

The Respo app features an integrated online store for spare parts and accessories.



Comprehensive support and warranties

- Continuous remote system maintenance and support via the mobile app.
- 5-year warranty on major system components.
- Personalized consultations.
- Periodic inspections and system maintenance.
