A) How to operate the wonder blower:

1. Try to blow it yourself- because you can feel and control the heat penetration.
2. Try to blow directly on the skin- it's also okay to blow through clothing.
3. Have faith in the terahertz wonder blower and believe that your body will be able to get better!
4. Take deep breath and chanting in your heart "Gone. Gone. Gone.", "Sickness gone, healthy comes".
5. Enjoy the process of blowing, you must be patient, gives some time to your body to repair itself, let the pain you have accumulated for years, slowly blown away and let your cells be healthy again.
6. When blood cells are healthy, blood circulation improve, it can now effectively bring oxygen and nutrition to other cells, at the same time flush away toxins and dead cells.
7. When the meridian cells are healthy, the nerves system will be unblocked, the organs can be nourished and back to function normally and effectively, a lot of pain will be eliminated.
8. You must drink two cups of warm water before and after blowing. (Thinning blood)
9. Every time when you blow, you should blow on the three acupuncture points, blow on the five lymphatic nodes, and blow on the two main meridians, together with that, then blowing on the sick and sores area will be more effective.
10. It is best not to get into cold conditioned for a few hours after therapy, do not eat cold food, and do not take shower.
11. Do not blow directly on the fan or air-conditioning after therapy. You can turn on the fan and AC, but not too cold or blowing directly onto your body!
12. Be sure to understand the contraindications and precautions of the therapy process before use.
13. It should also be understood that the possible improvement reaction after use, it is not side effect.
